This data table contains the following sheets:

1 All water levels used in subsequent calculations after the QA QC and downsampling processes.
2 Information for wells with water-levels in Sheet 1.
3 Water levels that appeared to be significant outliers and were removed during QA QC data review.
4 Water levels removed in downsampling process described in section *"Data Collection and Filtering"*.
5 Water levels whose residuals from the regional trend surface were identified as outliers as described in section *"Regional Trend Model"*
6 USGS Formation Codes

Information for wells with water levels in Sheet 1 used in subsequent calculations after the QA QC and downsampling process

Geology field codes (surface geology at well site): S = surficial deposits, basin fill; TSB = older Tertiary sedimentary rocks / bedrock; OB = pre-Tertiary bedrock
2. **Hydrologic zone codes (from Finch et al. 2008):** D = Deming; F = Florida, S = San Vicente, U = Upper Mimbres. Wells within 5 km of a zone boundary are identified by multiple letters
Boundary codes: Y = well within 5 km of hydrologic zone boundary; N = well not within 5 km of hydrologic zone boundary.
