## From subatomic particles to galaxies: The fields of physics and astronomy seek to explain our universe

Physics—the study of matter, energy and their interactions—is the most basic of the physical sciences. It is with the concepts developed in this field that we are able to understand all other fields in the natural sciences. Astronomy—the study of the cosmos, and perhaps the oldest of the natural sciences—has captured the imagination of scientists for millennia.

The *Springer Nature Physics and Astronomy eBook Collection* assembles knowledge from the greatest minds in these fields, including Nobel Prize winner Shuji Nakamura, Gerard 't Hooft, and more.

### Top cited 2018 eBooks

## eBooks Data

For the first time ever we're able to assess the impact of books via the unique platform of Bookmetrix. Here you can find a comprehensive overview of the reach, usage and readership of a book, chapter or a collection by providing various book-level and chapter-level metrics all in one place.

### Collection Citation Performance\*

2 year 2018 score: 2.34

5 year 2018 score: 2.84

\* The Collection Citation Performance for 2018 is calculated as the number of citations in 2018 of books published in 2016 and 2017 (or 2013-2017 for the 5-year indicator), divided by the total number of books published in this eBook collection in the same time period – similar to the well-established journal citation performance metrics.

**Large readership – More than 1.8 million downloads in 2018**

# Complete Coverage

All book types are included in the collection from textbooks, monographs to handbooks and reference works.

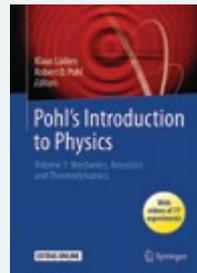

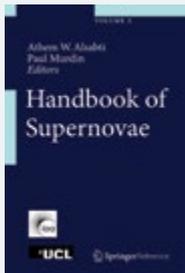

All Physics and Astronomy books are available on [link.springer.com](http://link.springer.com) where

- Usage is unlimited with no Digital Rights Management
- Users can access content in PDF, HTML or ePub format on any device at any time.
- Users from many countries can order a personal print copy via MyCopy

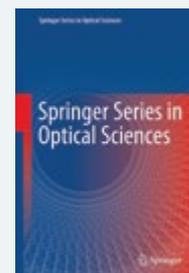

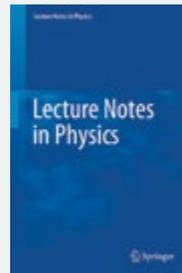

## Distribution of book types within the collection

Monograph	61%
Graduate/advanced undergraduate textbook	8%
Proceedings	7%
Popular science	6%
Brief	5%
Others	11%

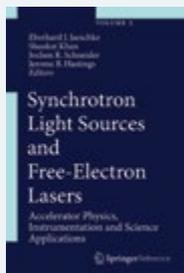

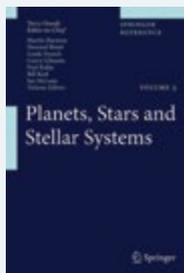

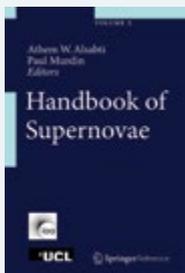

## Notable Textbooks

## Renowned Book Series

## Highly Regarded Reference Works

## Key topics in this collection:

- Condensed Matter Physics
- Mathematical Physics
- Particle and Nuclear Physics
- Astronomy
- AMOP (Atomic, Molecular, Optical and Plasma Physics)
- Mechanics and Dynamics
- Acoustics
- Quantum Physics
- Complexity
- Lasers and Photonics
- Cosmology
- Biophysics
- Space Sciences

## New & Emerging Research Areas:

- Data-driven Science
- Graphene and other 2D Materials
- Quantum Technology
- Gravitational Wave Cosmology
- Exoplanets
- Physics of Complex Networks

# Always Connected

## Connecting with Authors and Editors around the World

We are a truly international publisher, serving the research community around the globe. With hubs throughout Europe, the Americas and Asia Pacific we are perfectly positioned to connect with our book authors and editors wherever they are located. Our global base of editorial staff is located in cities such as New York, London, Heidelberg, Tokyo, Beijing, New Delhi, Singapore and São Paulo. They constantly travel to scientific meetings and universities to connect with the research community.

### Global Authorships

Source: Authormapper data

## Notable Contributors

- Shuji Nakamura (Nobel Laureate)
- Gerhard Ertl (Nobel laureate)
- Jack Steinberger (Nobel laureate)
- Gerard 't Hooft (Nobel laureate)
- Pierre-Gilles de Gennes (Nobel laureate, deceased)
- Mildred S. Dresselhaus (deceased)

### 2019 eBook title highlights

## Springer Nature eBooks

In 2015, the Springer and Palgrave Macmillan publishing brands came together under the newly formed company, Springer Nature. This brought together editorial teams with their subject matter expertise, coupled with longstanding publishing histories with the world's foremost authors and societies to allow Springer Nature to deliver the most complete STM and HSS book offerings available worldwide.
