Best in Books

Just as human history has been shaped by the intrinsic processes of Earth, the planet's natural processes are now being drastically influenced by humans.

Essentially everything we, as humans, need either comes from the Earth directly or depends on its environment in some way. Research in the fields of Earth and Environmental Sciences, therefore, has important implications for the continued success of our species on this planet. Using physical, biological, and chemical methods, researchers in these fields study geological processes and environmental systems. The marriage of these disciplines can provide an important historical perspective on contemporary global problems such as natural disasters, resource conservation, and environmental sustainability.

Springer's *Earth and Environmental Science eBook Collection* brings together up-to-date resources from trusted authors working around the world on topics such as water management, ecology, geology, environmental biotechnology, and sustainable development.

Top cited 2018 eBooks

eBooks Data

For the first time ever we're able to assess the impact of books via the unique platform of Bookmetrix. Here you can find a comprehensive overview of the reach, usage and readership of a book, chapter or a collection by providing various book-level and chapter-level metrics all in one place.

Collection Citation Performance*

2 year 2018 score: 3.10

5 year 2018 score: 3.93

* *The Collection Citation Performance for 2018 is calculated as the number of citations in 2018 of books published in 2016 and 2017 (or 2013-2017 for the 5-year indicator), divided by the total number of books published in this eBook collection in the same time period – similar to the well-established journal citation performance metrics.*

Large readership – More than 4.48 million downloads in 2018

Notable Textbooks

Renowned Book Series

Highly Regarded Reference Works

Key topics in this collection:

- sustainable development
- urban geography/urbanism
- geophysics/geodesy
- climate change
- atmospheric sciences
- Water
- Environmental Management
- Pollution
- Geology
- Natural hazards
- environmental chemistry
- paleontology
- geochemistry
- Geography
- Geotechnical engineering

New & Emerging Research Areas:

- Sustainability
- Water management
- Disaster resilience

Always Connected

Connecting with Authors and Editors around the World

We are a truly international publisher, serving the research community around the globe. With hubs throughout Europe, the Americas and Asia Pacific we are perfectly positioned to connect with our book authors and editors wherever they are located. Our global base of editorial staff is located in cities such as New York, London, Heidelberg, Tokyo, Beijing, New Delhi, Singapore and São Paulo. They constantly travel to scientific meetings and universities to connect with the research community.

Global Authorships

Notable Contributors

- Lennart Bengtsson, *University of Reading*
- Anny Cazenave, *Dr, CNES*
- W. Gary Ernst, *Professor Emeritus, Stanford University*
- David Gubbins, *Research Professor, University of Leeds*

2019 title highlight picks from our editors

Springer Nature eBooks

In 2015, the Springer and Palgrave Macmillan publishing brands came together under the newly formed company, Springer Nature. This brought together editorial teams with their subject matter expertise, coupled with longstanding publishing histories with the world's foremost authors and societies to allow Springer Nature to deliver the most complete STM and HSS book offerings available worldwide.
