Oxidative phosphorylation
Propanoate metabolism
Pyruvate metabolism
Ribosome
Glycerolipid metabolism
ATP synthesis
Alzheimer's disease
Arginine and proline metabolism
MAPK signaling pathway
Circadian rhythm
Huntington's disease
Complement and coagulation cascades
Cell cycle
Ganglioside biosynthesis
Inositol metabolism
Citrate cycle (TCA cycle)
Cysteine metabolism
Valine, leucine and isoleucine degradation
Butanoate metabolism
Phosphatidylinositol signaling system
Aminophosphonate metabolism
Glycolysis / Gluconeogenesis
One carbon pool by folate
Sulfur metabolism
1,2-Dichloroethane degradation
Ascorbate and aldarate metabolism
Integrin-mediated cell adhesion
Sterol biosynthesis
Lysine degradation
Histidine metabolism
Proteasome
Basal transcription factors
Phospholipid degradation
Terpenoid biosynthesis
Parkinson's disease
Tryptophan metabolism
Glycosylphosphatidylinositol (GPI)-anchor biosynthesis
Fatty acid metabolism
beta-Alanine metabolism
Glyoxylate and dicarboxylate metabolism
Ubiquitin mediated proteolysis
Purine metabolism
Porphyrin and chlorophyll metabolism
Phenylalanine, tyrosine and tryptophan biosynthesis
Urea cycle and metabolism of amino groups
Glycine, serine and threonine metabolism
Valine, leucine and isoleucine biosynthesis
Biotin metabolism
C5-Branched dibasic acid metabolism
D-Glutamine and D-glutamate metabolism
Tetrachloroethene degradation
Inositol phosphate metabolism
Nitrogen metabolism
Reductive carboxylate cycle (CO2 fixation)
Selenoamino acid metabolism
Methionine metabolism
Pantothenate and CoA biosynthesis
Bile acid biosynthesis
RNA polymerase
Carbon fixation
Nicotinate and nicotinamide metabolism
Pyrimidine metabolism
gamma-Hexachlorocyclohexane degradation
Starch and sucrose metabolism
Glutamate metabolism
Benzoate degradation via CoA ligation
Folate biosynthesis
Protein export
Aminoacyl-tRNA biosynthesis
Glutathione metabolism
Phenylalanine metabolism
Synthesis and degradation of ketone bodies
N-Glycan degradation
Fatty acid biosynthesis (path 2)
Androgen and estrogen metabolism
Type II secretion system
Amyotrophic lateral sclerosis (ALS)
Alanine and aspartate metabolism
C21-Steroid hormone metabolism
Riboflavin metabolism
Lysine biosynthesis
Streptomycin biosynthesis
Chondroitin / Heparan sulfate biosynthesis
Pentose phosphate pathway
Fructose and mannose metabolism
Tyrosine metabolism
Glycosaminoglycan degradation
D-Arginine and D-ornithine metabolism
Prostaglandin and leukotriene metabolism
Apoptosis
Prion disease
DNA polymerase
