Supplement & Builders **Archive Collection**

Supplement & Builders Archive Collection

The *Scientific American Supplement & Builders Archive Collection* is now available through site license access on nature.com. Bringing together more than 56,550 articles in over 2,500 issues, this collection contains content from the *Scientific American Supplement* and *Scientific American Builders* publications.

Available online as of September 2012, this collection provides educators, students and scientists with insight into advancements in biology, chemistry and physics from 1876-1921. In addition, the exquisite photographs and floor plans of unique houses and gardens offer those interested in architecture a historical look into building techniques from the 19th and 20th century.

Supplement (1876-1921)

- Focuses on pure science
- Features inventions, scientific discoveries, and biographies of scientists and inventors

Builders (1885-1905)

- Highlights building techniques and designs
- Features original photographs and floor plans from around the world

1 collection • 125+ volumes • 2,500+ issues • 56,550+ articles
