

LIFE SCIENCES

Nature-branded research and review journals

Understanding, debating and sharing science since 1869

Nature Research has a strong tradition in the life sciences, beginning with its flagship journal *Nature* which publishes the most important scholarly research in science and technology.

The life sciences portfolio also includes authoritative Nature-branded research journals and the acclaimed Nature Reviews series. The publications in the portfolio are all leading titles in their fields, meaning you can select them with confidence.

Nature Metabolism

Metabolism research is growing, due to the great urgency to learn how metabolic pathways influence diseases with huge societal impact, such as obesity and diabetes. By publishing top research and fostering the cross-pollination of ideas, *Nature Metabolism* will be essential reading for researchers working across the spectrum of metabolic research.

Nature Cancer

Nature Cancer aims to provide a unique forum through which the cancer community will learn about the latest, most significant cancer-related advances across the life, physical, applied and social sciences. It is an exclusively online publication. Research articles will be published as soon as they are ready, allowing readers' access weeks before papers appear in specific issues.

Reviews provide a comprehensive summary of the primary research in the field by filtering, highlighting and reviewing the latest research from the major disciplines.

Scientific American

Scientific American has been reporting on unique insights about inspiring developments in science and technology for more than 170 years. Every month the magazine features articles by scientists, many of who are Nobel Prize winners and top journalists. With an expertise for pinpointing emerging trends, Scientific American covers important ideas early – months or years before other media recognize their importance.
