

American Physiological Society (APS)

eBook Distribution Factsheet

The **American Physiological Society (APS)** is devoted to fostering education, scientific research, and dissemination of information in the physiological sciences. The Society was founded in 1887 with 28

Members and now has over 10,500 members. **APS** is a member of the Federation of American Societies for Experimental Biology (FASEB), a coalition of 26 independent societies that plays an active role in lobbying for the interests of biomedical scientists.

The American Physiological Society is commissioning book projects and Springer is providing editorial guidance, as well as production, marketing, sales and distribution services. In addition to the individual books, Springer publishes titles in three APS book series: Methods in Physiology, Physiology in Health and Disease and Perspectives in Physiology.

- All titles are published electronically as part of Springer's Biomedicine and Life Sciences eBook collection
- Springer has digitized 33 of APS's previous published titles to be included in the Springer Book Archives.
- Under the agreement, the society will be granted free access in perpetuity to the digital files of any works co-published.
