Nature Research has a strong tradition in the physical sciences, having published many leading papers in physics, materials science and chemistry throughout the years. Our emphasis is on editorial excellence and online innovation. All of our journals publish the most groundbreaking and important research advances within their discipline. Readers and users of these titles will find a unique mix of content keeping them up-to-date with the latest research findings, news, commentary and analysis within their fields. The journals also publish online specials and other supplemental content.

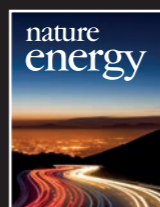

Nature

ISSN: 0028-0836
Impact Factor: 41.456*

Nature is the leading weekly international journal, publishing the finest peer-reviewed research in all fields of science and technology – a tradition that we have maintained for over a century. The journal also provides rapid, authoritative and insightful news and interpretation of topical and emerging trends affecting science, scientists and the wider public. Some issues demand more in-depth coverage and so, on top of the regular weekly content, *Nature* also publishes a series of topical Insights, Supplements and Online Specials.

www.nature.com/nature

Nature Energy

ISSN: 2058-7546
Impact Factor: DUE 2017

Launching in 2016, *Nature Energy* will publish the most significant research on sustainable energy generation, storage and management. As energy and socio-economic development, and therefore societal well-being, are interlinked, it will be a truly thematic journal spanning the natural and social sciences.

www.nature.com/nenergy

Nature Chemistry

ISSN: 1755-4330
Impact Factor: 25.325*

Nature Chemistry is a monthly journal dedicated to publishing high-quality papers that describe the most significant and cutting-edge research in all areas of chemistry. As well as reflecting the traditional core subjects of analytical, inorganic, organic and physical chemistry, the journal features a broad range of chemical research in more specialist fields, including cross-disciplinary topics such as bioinorganic, bioorganic, organometallic and physical-organic chemistry.

www.nature.com/nchem

Nature Chemical Biology

ISSN: 1552-4450
Impact Factor: 12.996*

Nature Chemical Biology is committed to the publication of top tier original research and commentary at the interface of chemistry, biology and allied disciplines. The journal publishes original research in two formats; Brief Communications and Articles. Each issue also features a diverse selection of other articles including Editorials, Commentaries, Reviews, Perspectives, Interviews, Research Highlights and Meeting Reports designed to keep readers aware of frontier areas in this rapidly moving field.

www.nature.com/nchembio

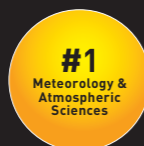

Nature Climate Change

ISSN: 1758-678X
Impact Factor: 14.547*

Nature Climate Change is a monthly journal dedicated to publishing high-quality research papers that describe the most significant and cutting-edge research on the impacts and wider implications of global climate change. The journal publishes climate research across the physical, biological, environmental and social sciences and strives to synthesize interdisciplinary research.

www.nature.com/nclimate

Nature Geoscience

ISSN: 1752-0894
Impact Factor: 11.740*

Nature Geoscience is a monthly multi-disciplinary journal bringing together top-quality research across the entire spectrum of the Earth and planetary sciences. The journal's content reflects all the disciplines within the geosciences, encompassing field work, modelling and theoretical studies. In addition to publishing primary research, *Nature Geoscience* provides an overview of the most important developments in the Earth and planetary sciences through the publication of Review Articles, News and Views and Research Highlights.

www.nature.com/ngeo

Nature Materials

ISSN: 1476-1122
Impact Factor: 36.503*

Nature Materials is a multi-disciplinary journal bringing together cutting-edge research across the entire spectrum of materials science and technology. *Nature Materials* is the leading journal in the field of materials science and also across all the primary research journals in physics and chemistry.

www.nature.com/nmat

Nature Nanotechnology

ISSN: 1748-3395
Impact Factor: 34.048*

Nature Nanotechnology is dedicated to publishing high-quality original research papers in all areas of nanoscience and nanotechnology. Coverage in the journal extends from basic research in physics, chemistry and biology, through to the development of new materials and devices for applications in a wide range of industrial sectors (including information technology, medicine and energy technologies).

www.nature.com/nnano

Nature Photonics

ISSN: 1749-4885
Impact Factor: 32.386*

Nature Photonics is a monthly journal dedicated to research in all areas of light generation, manipulation and detection. Coverage extends from research into the fundamental properties of light and how it interacts with matter through to the latest designs of optoelectronic device and emerging applications that exploit photons.

www.nature.com/nphoton

Nature Physics

ISSN: 1745-2473
Impact Factor: 20.147*

Nature Physics publishes research of the highest quality and significance in both pure and applied physics. The journal's remit includes semiconductors and superconductors, quantum information and nonlinear optics, device physics, black holes – in fact, all that physics has to offer.

www.nature.com/nphys

Nature Plants

ISSN: 2055-026X
Impact Factor: DUE 2016

Nature Plants will be a monthly, multi-disciplinary journal encompassing all aspects of plants, be it their evolution, development or metabolism, or interactions with their environment. It will publish primary research into the molecular biology, physiology and ecology of plants, in both the basic and applied research spheres. Translational areas of research such as plant breeding and crop science will also be incorporated, with the focus being on cutting edge articles that advance knowledge and inform development across a diversity of areas.

www.nature.com/nplants

Polymer Journal

ISSN: 0032-3896
Impact Factor: 1.653*
Official journal of the Society of Polymer Science, Japan

Polymer Journal publishes high-quality Original Articles, Notes, Rapid Communications, Reviews and Focus Reviews on cutting-edge developments in macromolecule research. The journal promotes research from all aspects of polymer science from anywhere in the world and aims to provide an integrated platform for scientific communication that assists the advancement of polymer science and related fields.

www.nature.com/pj

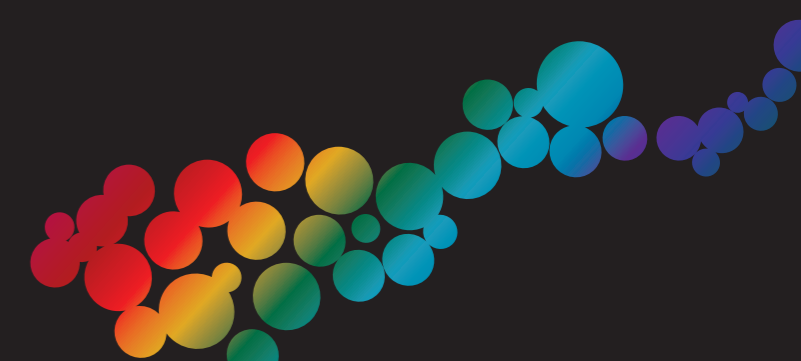

Scientific American

ISSN: 0036-8733
Impact Factor: 1.070*

Scientific American has been reporting on unique insights about inspiring developments in science and technology for more than 165 years. Every month the magazine features articles by scientists, many of who are Nobel Prize winners and top journalists. With an expertise for pinpointing emerging trends, *Scientific American* covers important ideas early – months or years before other media recognize their importance.
