

Springer Nature SciGraph

A Linked Open Data platform for the scholarly domain

SN SciGraph

- > Collaborative effort: Springer Nature ∞ Digital Science
- > Supporting internal use cases, but also contributing to an emerging web of **linked science data**
- > Semantic Web technology stack allows for scalable and expressive enterprise-level metadata management
- > Not just publications but a **wealth** of other related data

Product Vision

We create the largest state-of-the-art linked data aggregation platform for the scholarly domain. In doing so, we increase content discoverability and provide data tools and services for researchers, authors, editors, librarians, data scientists, funders, conference organizers, and many others by adding value across all content types.

From Content to Data
