YOUR PARTNER IN ELECTRONICS

R&D innovation starts with you. Give your researchers immediate access to one of the world’s most comprehensive and authoritative Electronics portfolios.

• Content collections that are the world’s most extensive and cover every segment of your industry from latest semiconductor materials and applications to Industry 4.0 and AI.
Our electronics portfolio is the most extensive in the market

The Electronics industry has always been at the forefront of innovation, enabling the digital evolution of our society and requires that your researchers have access to latest research to fuel this innovation. As an information professional, you’re not only accountable for driving industry-leading knowledge and improving R&D efficiency in your organization, you also need to show a clear return on your information budget. These are big challenges and our mission is to help you exceed them.

Alongside Springer Nature’s comprehensive Electronics portfolio is the world’s leading IT & Software collection as well as key content and resources related to material science. This allows us to provide a one stop content solution that supports key R&D related to your core business as well as all aspects of Industry 4.0, such as the latest in sensor technology, data analytics, computer vision, machine learning and automation. By doing so you ensure that your organization keeps ahead of the latest industry trends and can maximize on the benefits of digitization.

Springer Nature gives your researchers rapid access to peer reviewed original content including the high impact Nature Journals, specialist Springer Journals, the world’s most comprehensive engineering and computer science Ebook collection and the largest collection of materials data in the Springer Materials and Nano databases. Our flexible licensing means you pick exactly the information you need, so you only ever pay for what you’re using. Quick reporting tools let you easily demonstrate value to other departments and adapt your collections so that you always satisfy user-demand. With Springer Nature, your information reputation is strong, your researchers are productive and your organization stays at the forefront of innovation.
Optimize your workflow by integrating our content

We deliver content aimed at everyone working within the industry, whether in design and development, testing or manufacture and production. Whether researching fundamental background information for innovating new products, or to the latest case studies, we recognize that R&D groups need to be able to discover and access scientific and technical information quickly and efficiently.

| Journals          | Peer Reviewed innovations from the last 1 to 2 | Journals articles are the result of in-depth studies and strong peer review process. They provide detailed and high quality information on new engineering | In-depth background information as well as detailed descriptions of the application of testing methods | Proceedings focus on applications and case studies providing the broadest range of engineering challenges, test methods and data | SpringerMaterials and Nano:  
  • provide critical chemical and physical parameters of materials  
  • help determine the right materials to be used in new applications  
  • rapid access to key data points |
| eBooks            | Fundamentals and Innovations from the last 2+ years | Mature descriptions and discussions of engineering fundamentals and recent applications including the highly authoritative Springer Technical Handbooks | | Includes the world's largest collection of proceedings on Industry 4.0 as well as the Lecture Notes in Computer Science (LNCS and LNAI) | |
| Proceedings       | Recent Innovations and Case Studies              | | | | |
| Databases         | Expertly distilled tertiary information          | SpringerMaterials and Nano:  
  • provide critical chemical and physical parameters of materials  
  • help determine the right materials to be used in new applications  
  • rapid access to key data points | | Manufacturing and production often present new materials engineering challenges. Process optimization requires access to trusted materials data | |
How to get access to the content you need

Flexible business models enable you to get access to the content you need, maximizing usage and return on investment. With licensing models from low entry tailored collections to licensing single content collections, archived content or the entire content database.

Request a trial to see how your organization can benefit from partnering with Springer Nature. Or ask a representative about the ideal solution for your organization, department or team today!
