AdisInsight
Written by scientists

• A database to support drug discovery, research and development, based on trusted, scientifically-sound data
• Expertly reviewed, assessed and summarized by a team of scientists
• A single search delivers results on drugs, trials, deals and safety

Focus on the most promising research paths
Rapidly assess the competitive drug landscape to identify areas where research would contribute most to filling gaps in therapy and have the greatest licensing potential

Make greater discoveries
Identify and assess potential opportunities by seeing the full picture of a drug’s performance or a disease landscape, with important information on drugs, trials, deals and safety reports all in one place

Gain a competitive advantage
Stay at the forefront of your area by adapting your research focus according to the most compelling new information

Improve work efficiency
Reduce the time taken to answer critical research questions with easily easy-to-digest, consolidated scientific and commercial data from multiple sources
**What makes AdisInsight different is our scientific expertise**

Unlike our competitors, we don’t just “copy and paste” or add unnecessary information in a bid to have the biggest database. Our focus is on **quality and relevance**, which is achieved by following a methodical approach to identifying, evaluating and summarizing content. Our team of scientists cut out unnecessary “noise” and extract the most essential scientific information.

**Become a more focused and efficient researcher**

AdisInsight brings together the most relevant information on drugs in commercial development, clinical trials, drug safety and company deals in one database, giving you rapid access to consolidated scientific information.

**Less searching, more discovering**

AdisInsight makes expertly-written drug information more accessible through its easy-to-use database. With a single search, you get highly-focused results from across the whole drug lifecycle.
