

Find Nanomaterial Summaries, Nanotechnology Articles and Nanotechnology Patents all in one place!

Did you know that we have a subscription to [Nano](#)? This entitles you and your colleagues to access this invaluable research resource – so please do spread the word!

What is Nano?

[Nano](#) is the Nature Research database which offers the most comprehensive collection of nanomaterial data and literature references in the world. It contains:

- **300,000+ manually curated Nanomaterial Summaries** covering size, nanostructure, composition, application, characterization, preparation, toxicity and property
 - **820,000+ Nanotechnology articles** from a wide range of publishers including AAAS, ACS, Elsevier, RSC, Springer Nature and Wiley
 - **24,000,000+ Nanotechnology patents** with easily accessible patent claim information and standardised patent summaries translated into English
-

Start using Nano today and you will:

- **Accelerate your research** - all the nanotechnology information you need is on one platform
 - **Improve your findings** - by easily retrieving accurate search results with advanced nano-specific filter options
 - **Identify new research opportunities** - by including patents in your daily literature search
-
