You've got access to one of the largest materials science databases in the world!

We've agreed an institution-wide subscription to SpringerMaterials. So please spread the word to your colleagues!

SpringerMaterials will save you time. It's intuitive search functionality will deliver the information you need with minimal effort.

You can:

- View details of 290,000+ materials
- Access 3,000+ properties
- Export data and citation information in multiple formats
- Engage with interactive graphs, corrosion data sets, phase diagrams, crystal structures and side-by-side comparisons of material properties
- Access the Landolt-Börnstein book series, MSI Eureka, and Polymer Thermodynamics Database (ATHAS)
