

Supplementary figure 7

**Supplementary figure 7. cDC1, cDC2 and pDC-mediated NK cell activation is not hampered by non-DCs (a-c)** MFI of activating and inhibitory molecules, degranulation and THP-1 killing by NK cells after 2 days co-culture with cDC2s, cDC1s or pDCs in the absence or presence of non-DCs. **(d)** Release of pro-inflammatory cytokine IFN- $\alpha$  by 1 hour matured DCs in the absence or presence of NK cells. **(e)** Correlation of DC-derived IFN- $\alpha$  and NK cell-derived IFN- $\gamma$ . **(a-e)** Data is shown as mean  $\pm$  SEM (n=3). Statistical analyses were performed using a paired T-test **(e)**, a Pearson correlation **(e)** or repeated measures one-way ANOVA followed by Bonferroni correction comparing selected pairs of means **(a-c)**. \* $P < 0.05$ , \*\* $P < 0.01$ , \*\*\* $P < 0.001$ .
