

Supplementary Figure 2

Fig. S2 A: Orthogonal projections to latent structures discriminant analysis (left: PCA; right: OPLS-DA) plot for comparison of each groups. **B:** Heatmap of differential metabolites between db/db mice diabetic group and db/db + SS31 treatment group. Blue is db/db diabetic group, and red is the db/db + SS31 group. **C:** The disturbed metabolic pathways from comparison between db/db mice diabetic group and db/db + SS31 treatment group. S2: db/db mice diabetic group, S3: db/db + SS31 treatment group.
