

Supplementary Figure 2

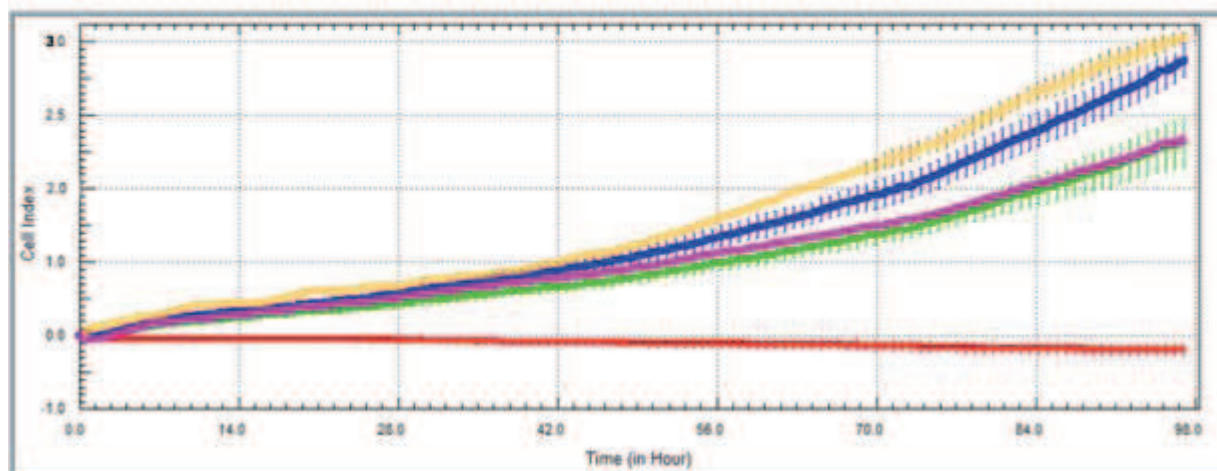

HaCaT migration

- serum free
- control
- +HMGB1
- blocking Ab+HMGB1
- isotype Ab+HMGB1

In this paper, we investigated the effect of HMGB1 but not LPS therefore we used in our experiments with cells HMGB1 only.

HaCaT proliferation

Supplementary Figure 2. Effects of RAGE triggering with HMGB1 (100ng/mL) on TLR4-silenced HaCaT cells proliferation and migration.
