Supplementary Figure 1. The mean (SD) densities from repeated yearly measurements of a phantom. The phantom consists of five different densities, here named Density 1 to 5. Number of measurements: 2011 = 24, 2012 = 61, 2013 = 167, 2014 = 206, 2015 = 213. Circle represents mean density. Error bars for SD are included in the figure (not visible due to small SDs). HA, hydroxyapatite, SD; standard deviation
