

a

Changes in lumbar spine BMD (%)

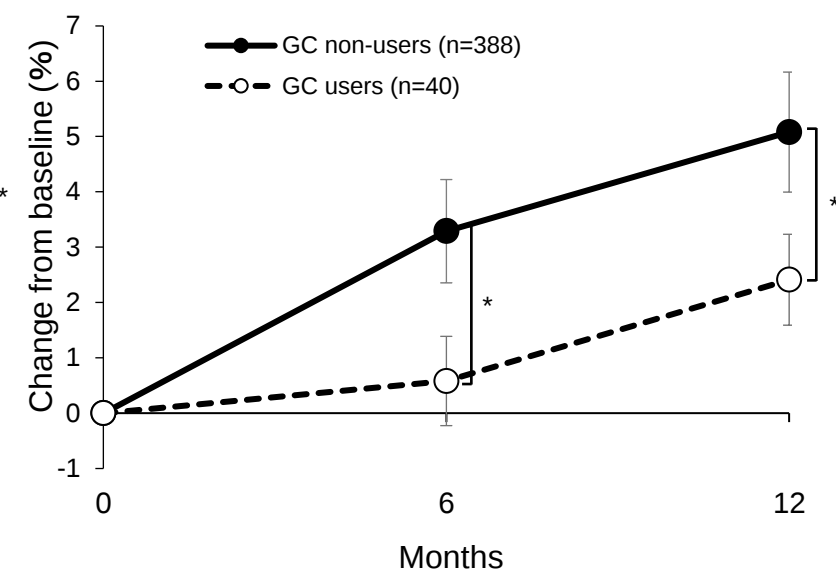

b

Changes in total hip BMD (%)

c

Changes in femoral neck BMD (%)

Supplementary Figure S2. Percentage change in bone mineral density (BMD) in the lumbar spine (a), total hip (b), and femoral neck (c) in the unweighted cohort. BMD, bone mineral density; GC, glucocorticoid. Bars indicate mean $\pm$ standard errors. * $P < 0.05$, GC non-users vs GC users.
