

Original western blots

 Western blot analysis of BCRP protein expression. The blot shows 10 lanes with labels: PBS, PTZ, LTG, LTG+PTZ, KO, and Metformin. A prominent band is visible at 70 kDa in all lanes, indicating BCRP expression.	BCRP
 Western blot analysis of β-actin protein expression. The blot shows 10 lanes with labels: PBS, PTZ, LTG, LTG+PTZ, KO, and Metformin. A prominent band is visible at 45 kDa in all lanes, indicating β-actin expression.	β - actin
