Supplementary Material

Table S1 Left: Species that belong to the genus *Amphiroa*, which, according to algaebase.com, can be found within the Indonesian archipelago. Right: Species of the genus *Sargassum*, which can be found in the region of the Thousand Islands, Indonesia (An Nisa Suci, personal communication)

Species name: <i>Amphiroa</i> spp.	Species name: <i>Sargassum</i> spp.
<i>Amphiroa anastomosans</i>	<i>Sargassum asperifolium</i>
<i>Amphiroa anceps</i>	<i>Sargassum binderi</i>
<i>Amphiroa beauvoisii</i>	<i>Sargassum ilicifolium</i>
<i>Amphiroa bowerbankii</i>	<i>Sargassum polycystum</i>
<i>Amphiroa canaliculata</i>	
<i>Amphiroa crassa</i>	
<i>Amphiroa crassa</i> f. <i>minuta</i>	
<i>Amphiroa ephedraea</i>	
<i>Amphiroa foliacea</i>	
<i>Amphiroa foliacea</i> f. <i>erecta</i>	
<i>Amphiroa foliacea</i> f. <i>procumbens</i>	
<i>Amphiroa fragilissima</i>	
<i>Amphiroa fragilissima</i> f. <i>cuspidata</i>	
<i>Amphiroa fragilissima</i> f. <i>cyathifera</i>	
<i>Amphiroa rigida</i>	
<i>Amphiroa tribulus</i>	

Table S2 Targeted and realised mean water temperatures during acclimation and during the feeding assays (24 h) in Experiment 1 (NA=Not Available)

	Start	End	Temperature [°C]					
Temperature acclimation	2018-06-23	2018-06-26	Targeted	27	28.5	30	31.5	33
			Realised ($\pm$ SD)	26.9 (0.2)	28.5 (0.1)	30 (0.2)	NA	33.2 (0.2)
Feeding assay	2018-06-26 11:52	2018-06-27 11:46	Targeted	27	28.5	30	31.5	33
			Realised ($\pm$ SD)	26.9 (0.1)	28.7 (0.3)	30.3 (0.2)	NA	33.6 (0.1)

Table S3 Targeted and realised mean water temperatures during the acclimation and the feeding assays (24 h) in Experiment 2

	Start	End	Temperature [°C]		
Temperature acclimation	2018-07-30	2018-08-09	Targeted	27	29 31
			Realised ($\pm$ SD)	26.6 (0.2)	28.7 (0.2) 30.3 (0.2)
Feeding assay	2018-08-09 13:12	2018-08-10 13:12	Targeted	27	29 31
			Realised ($\pm$ SD)	26.8 (0.2)	28.7 (0.1) 30.4 (0.3)
