

A half-century of demographic changes in a green turtle (*Chelonia mydas*) foraging aggregation during an era of seagrass decline

P.A. Meylan, R.F. Hardy, J.A. Gray and A.B. Meylan

Table S-2. Adjustments to CPUE (density) and BPUE (biomass) estimates from sets of an entrapment net based on the length of the net and the area that would be enclosed under changing net length and during point-to-point sets.

YEAR OF STUDY	ADJUSTMENT FOR SHORTENED NET AND CIRCULAR SET	ADJUSTMENT FOR SHORTENED NET	
		<u>and</u> point to point set with straight shoreline	<u>and</u> point to point set with embayment
1992 to 2011	1.0	0.500	0.250
2012 to 2015	1.287	0.643	0.322
2016	2.399	1.199	0.600
2017-present	2.068	1.034	0.517
