

ESM Table 2 Re-sighting summary for # individuals observed with fresh bites. The total number of re-sightings indicates the number of sightings with a fresh, healing or healed bite that occurred after the fresh bite was documented. Also included are the number of times the same side of the body and same location on the body were visible, the minimum, maximum and mean number of re-sightings (with standard error)

	Minimum	Maximum	Mean	SE ±	% Re-sighted
Number of Re-sightings of					
Individuals Post	0	39	10.3	0.87	92.2
