

Supplementary Fig. 3 NIRF imaging of AIA (n= 3) and Ctrl mice (n= 3). **(a)** X-ray and NIRF merged images 6 hours after the injection of IRDye680RD-4-1BB mAb.; **(b)**. **Immediately** after the 6-hour scan, certain organs (1. heart, 2. liver, 3. lung, 4. spleen, 5. kidney, 6. right hind paw, 7. left hind paw, 8. femur, 9. muscle, and 10. intestine) were collected and ex vivo NIRF images were acquired. **(c)** Semi-quantification **was** counted. All values represent the mean $\pm$ SEM unless otherwise specified. Unpaired 2-tailed Student's t test was used for analyses, ****, $p < 0.0001$; ***, $p < 0.001$; **, $p < 0.01$; *, $p < 0.05$.
