

Inguinal Hernia Teaching Model

- 1) Cut along the borders of Pane 1, 2 and 3.
- 2) Create superficial and deep rings by cutting ✂ along their dashed outlines.
- 3) Staple the three panes together at its top corners with Pane 1 at the front and Pane 3 at the back.
- 4) Feed 'spermatic cord' through superficial and deep rings.
- 5) The model can be supplemented to simulate normal anatomy or pathological states e.g. direct, indirect or a completed open hernia mesh repair.
