

Online Resource 4: Survey for rheumatologists

Age	
Sex	
Years as a practicing rheumatologist	

Question	Cross one		
	Not at all	Somewhat	Very
How aware are you of the treat-to-target (T2T) recommendations for axSpA? (For example, from articles or congresses?)			

Questions regarding composite disease activity scores (e.g. ASDAS):

Statement	Cross one				
	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
I see an added value of these measurement instruments in clinical practice.					
I take the results of these measurement instruments (as a whole) into account in my treatment decisions.					
I take individual components of these measurement instruments into account when deciding on a treatment plan.					
These instruments provide me with insufficient insight into the actual disease activity of a patient.					
I agree with the cut-off values used by these instruments to determine low or high disease activity.					

Questions regarding T2T in axSpA:

Statement	Cross one				
	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
There is sufficient evidence regarding T2T in clinical practice.					
The T2T recommendations are applicable to my patients.					
I have trust in the developers of the T2T recommendations.					
The T2T recommendations can be applied with flexibility.					
The T2T recommendations do not restrict a doctor's autonomy.					

The T2T recommendations lead to favourable outcomes.					
The T2T recommendations can be feasibly implemented in clinical practice.					
I am motivated to apply the T2T recommendations in clinical practice.					
I am hindered in applying T2T in clinical practice due to patient-related factors.					
I do not have time to apply the T2T recommendations in clinical practice.					
I do not have enough resources available to apply the T2T recommendations.
