Supplementary Figures

Figure S1. As in Figure 1, but with all anticyclone centres located at elevations over 1000m in ERA5 (regridded to a 1° resolution) removed prior to calculations. Areas with elevation above 100m are also shaded in grey.

Figure S2. As in Figure 4, but with all anticyclone centres located at elevations over 1000m in ERA5 (regridded to a 1° resolution) removed prior to calculations. Areas with elevation above 100m are also shaded in grey.
