

Electronic Supplementary Material 4.

Chemical parameters of olivine I, orthopyroxene I and clinopyroxene I from Befang peridotites and websterite (averages for each sample) compared to those published in studies of J. Liu et al. 2020, C.-Z. Liu et al. 2017, Pintér et al. 2015 and Temdjim 2012 (blue field, based on average mineral compositions of the studied samples).
