Supplementary Data

Supplementary Figure 1. Representative dark-adapted ERG waveforms of representative *RPE65/rd12* mice from each study group at P28 and P84.

Representative dark-adapted (DA-)ERG waveforms of PBS- (**A, C**) and minocycline (**B, D**)-treated mice at P28 (**A, B**) and P84 (**C, D**).

Supplementary Figure 2. Representative light-adapted ERG waveforms of representative *RPE65/rd12* mice from each study group at P28 and P84.

Representative light-adapted (LA)-ERG waveforms of PBS- (**A, C**) and minocycline (**B, D**)-treated mice at P28 (**A, B**) and P84 (**C, D**).
