

**Suppl. Fig. S8** Effect of 1 mM galactose on roots grown on different media. **a, b** Knop/agar for 6 days. **c, d** MS/gelrite for 8 days. **e, f** MS/phytagel for 8 days. **g, h** MS/agar with 20x boric acid for 7 days. **i - l** MS/agar supplemented with 200 mM mannitol for 14 (**i, j**) and 8 days (**k, l**). Asterisks and thin arrows indicate enlarged cells. The thick arrow in **l** points to a cell wall stub. Bars 200  $\mu$ m (**a, c, e, g, i**), 100  $\mu$ m (**b, d, f, h, j, k**) and 50  $\mu$ m (**l**)
