Time-course ratios of the percentage of injected activity per gram (%IA/g) between tumor and muscle for [¹¹¹In]In-DOTA-TRK-950

Tumor specificity of [¹¹¹In]In-DOTA-TRK-950 was evaluated by dividing the %IA/g of the tumor by that of the muscle over a period of 24 to 168 hours in 4T1 and HT-29 bearing mice (n = 3–4 animals/group). The error bars indicate the standard error of the mean (SEM).
