

Online Resource 2: 30-year (1981–2010) averages and standard deviations of summer mean temperatures (TmeanJJA), July mean of daily maximum temperature (TmaxJUL) and summer hot days (HD), and 51-year (1961–2011) trends with 95% confidence interval for the same indices at six locations in Slovenia.

Index	Location	Bilje	Ljubljana	Celje	Murska Sobota	Novo mesto	Postojna
TmeanJJA (°C)	Average	21.4	20.3	19.1	19.7	19.8	18.0
	St.dev.	1.7	1.7	1.5	1.6	1.6	1.6
TmaxJUL (°C)	Average	29.0	27.3	26.9	27.0	26.8	25.5
	St. dev.	1.5	1.4	1.4	1.5	1.3	1.5
HD (days)	Average	30.8	18.5	16.9	16.6	15.6	7.9
	St. dev.	12.5	10.8	10.5	11.5	10.9	8.4
trTmeanJJA (°C/decade)	Average	0.4	0.5	0.5	0.4	0.5	0.5
	Conf. int.	0.3-0.5	0.3-0.6	0.3-0.6	0.3-0.6	0.4-0.7	0.3-0.6
trTmaxJUL (°C/decade)	Average	0.4	0.5	0.5	0.5	0.5	0.5
	Conf. int.	0.2-0.7	0.2-0.7	0.2-0.8	0.3-0.8	0.3-0.7	0.2-0.8
trHD (days/decade)	Average	3.2	2.9	2.5	3.3	2.7	1.7
	Conf. int.	2.8-4.1	2.6-3.7	2.4-3.4	3.1-4.2	2.7-3.6	1.7-2.7

Implications of climate change on the manufacturing sector in Slovenia: with particular reference to summer heat
