

Conflict of Interest Disclosure Form

It is the policy of the Journal *Acta Diabetologica* to ensure balance, independence, objectivity, and scientific rigor in the Journal. All authors are expected to disclose to the readers any real or apparent conflict(s) of interest that may have a direct bearing on the subject matter of the article. This pertains to relationships with pharmaceutical companies, biomedical device manufacturers or other corporations whose products or services may be related to the subject matter of the article or who have sponsored the study.

The intent of the policy is not to prevent authors with a potential conflict of interest from publication. It is merely intended that any potential conflict should be identified openly so that the readers may form their own judgements about the article with the full disclosure of the facts. It is for the readers to determine whether the authors' outside interest may reflect a possible bias in either the exposition of the conclusions presented.

The corresponding author will complete and submit this form to the Editor-in-Chief on behalf of all authors listed below.

Article Title
 Relationship between Body Adiposity and Glycemic Control in Children and Adolescents with Type 1 Diabetes

Authors
 Claudio Maffei, Ilaria Fierri, Elisa Morotti, Erika Caiazza, Quincy Pedranzini, Marco Marigliano, Claudia Piona
