

Appendix C: Interview Guideline

Case Study	Interview partner	Topic
Case study 1: Flood	Stakeholders	Introduction - Aim of the research - Brief overview of prior developments in the region regarding adaptation (flooding) and mitigation (building construction)
		Strategies - Evolution including phases of planning, design, realization, evaluation, revision - Stated objectives of the respective strategy - Underlying reasons and potential change - Specific circumstances or events influencing strategy development, realization and ad-hoc revisions - Connection of strategy to climate change mitigation and adaptation - Narratives including opinion about, evaluation of and the perceived responsibilities for particular strategies - Individual or organizational positions towards strategies and their objectives
		Actors - Key actors involved in strategy processes - Interactions between key actors - Influence of key actors on strategy development and realization - Spirit of collaboration and potential conflicts - Interview partners' activities and responsibilities in strategy development and realization
		Shock - Description of shock, impact on institutions and policy priorities - Intersection with policy strategies in other sectors
	Affected Individuals	Household structure - Household size, building type and condition, flood experience, biographical stage, residential needs
		Perceived flood risk - Expected severity of future floods - Emotional risk perception - Recovery and reconstruction after the 2013 flood
		Flood-proofing of the home - Efficacy of implemented measures - Costs and funding for measures - Self-efficacy in coping with floods - Reasons for inaction, denial or wishful thinking

		- Role of regulations
		Energy efficient renovation of the home - Efficacy of implemented measures - Costs and funding for measures - Self-efficacy in modifying the building - Reasons for inaction and attribution of responsibility - Role of regulations
Case Study 2: Multi-seasonal drought	Stakeholders	Introduction - Aim of the research - Brief overview of prior developments in the region
		Strategies - Evolution including phases of planning, design, realization, evaluation, revision - Stated objectives of the respective strategy - Underlying reasons and potential change - Specific circumstances or events influencing strategy development or realization - Connection of strategy to climate change mitigation and adaptation - Narratives including opinion about, evaluation of and the perceived responsibilities for particular strategies - Individual or organizational positions towards strategies and their objectives
		Actors - Key actors involved in strategy processes - Interactions between key actors - Influence of key actors on strategy development and realization - Spirit of collaboration and potential conflicts - Interview partners' activities and responsibilities in strategy development and realization
		Shock - Description of shock, impact on institution, strategies and policy priorities
	Affected Individuals	Farm structure - Farm size, years of experience, main crops, conventional/organic, characterisation of irrigation
		Perceived impacts of drought on farm - Impact of repeated drought - Damage caused by recent drought events - Assessment of future damage and coping capacity
		Implemented measures - Efficacy of implemented measures - Costs and funding for measures - Role of consultancy, other farms or regulations

Case Study 3: COVID-19		Planned measures - Future implementation of measures - Other known or helpful measures - Self-efficacy in coping with drought - Reasons for inaction
		External water dotation and irrigation - Irrigation systems and recent adjustments - Effects of irrigation bans on farm - Opinion on external water dotation
		Opinion on agricultural policy - Opinion on discussions regarding development of agriculture in the region and on political discussion
	Stakeholders	Introduction - Aim of the research - Brief overview of field of activity
		Strategies - Evolution including phases of planning, design, realization, evaluation, revision - Stated objectives of the respective strategy - Underlying reasons and potential change - Specific circumstances or events influencing strategy development or realization - Connection of strategy to climate change mitigation and adaptation - Narratives including opinion about, evaluation of and the perceived responsibilities for particular strategies - Individual or organizational positions towards strategies and their objectives
		Actors - Key actors involved in strategy processes - Interactions between key actors and different priorities - Influence of key actors on strategy development and realization - Spirit of collaboration and potential conflicts - Interview partners' activities and responsibilities in strategy development and realization - Interview partners' beliefs related to climate change
		Shock - Description of shock, impact on institution, strategies and policy priorities
	Affected Individuals	Business Structure - funding year, number of beds, facilities, certifications, energy sources/technical systems, main tourism season, target group
		Perceived impacts of COVID-19 on business

		Perceived impacts of climate change - present and future, perceptions, opportunities to act, priorities)
		Implemented measures - (description, subsidies, reasons, effectiveness)
		Planned measures - motives, subsidies - Self-efficacy in coping with COVID-19 and with climate change - Reasons for inaction or for postponing action
		Opinion on tourism and sustainability policy - roles and responsibilities, perception, satisfaction
