

Habitat displacement effect between two competing owl species in fragmented forests

Łukasz Kajtoch • Michał Żmihorski • Paweł Wieczorek

Supplementary table 1. Frequencies of forest habitats and tree species in studied areas.

Area		Characteristics
Carpathian Foothills	Kraków Uplands	
Forest habitats (%)		
84.00	54.50	beech-fir
15.00	39.00	pine-oak
1.00	6.50	others
100.00	100.00	Σ
Tree species (%)		
35.00	62.00	pine
20.00	2.50	fir & spruce
22.00	21.50	beech
13.00	6.00	oak
10.00	8.00	hornbeam & birch & others
100.00	100.00	Σ
