

Supplemental Figure 1. Phylogenetic tree of 16S rRNA gene sequences related to sulfate-reducing bacteria (SRB) belonging to *Deltaproteobacteria* at Ports 1 and/or 4 (day 506, January 2015). The sequence names (*de novo* + number) in red, blue, and green represent the 16S rRNA gene sequences detected from Port 1, Port 4, and both Ports 1 and 4, respectively. GenBank accession numbers for the reference sequences are shown.
