

Role of the neo-rural movement and the new peasantry in agroecological transitions: a literature review

Agriculture and Human Values

Online Resource 2

Table 1. Coding scheme

Category	Subcategory	Approach	Description and Variables
Year	-	Inductive	Year of publication
Geographical distribution	-	Inductive	Continent where the case study is located: Asia, Africa, Europe, Nord America, South America, Oceania, non-specified (theoretical research, case of study)
Research characteristics	Type of publication	Inductive	Book chapter, Conference's proceedings, Grey literature, PhD dissertation, Report, Scientific paper
	Methodological approach	Inductive	What was the type of data assessed: Qualitative, quantitative, mixed, or na (if not clear)
	Type of study	Inductive	Theoretical, case of study or both
	Spatial Scale	Inductive	Spatial scale of the case studies: Local, regional, sub-state, state, multi-state, continent, global.
	Language	Inductive	Original language of the study: english, Spanish, Italian, French, Portuguese, Chinese.
	Discipline	Inductive	Specific mentioned or journal index categories e.g Sociology, Economy, Ecology, Anthropology, Geography...
Methodological approach	Data collection specific methods	Inductive	Methods used to collect the data in the studies, own words, e.g interview, observation, question, na
Conceptual approach	Use of words in the paper	Inductive	Terms used in the publications, own words, e.g neo-rural, new farmer, new peasant, back-to-the-land, neo-peasant, newcomer, hippy...
	Concept definition	Inductive	Whether the study included a definition of neorurality and complete quote of the definition

Focus	Profile of neo-rural	Deductive	What were the topics that publications focused on and full citation of content
	Motivations and values	Deductive	
	Barriers	Deductive	
	Impacts and consequences	Deductive	
	Relationships between neo-rural and locals	Deductive	
Impacts and consequences	Type of impact	Deductive	Different types of consequences with complete references for each example: socio-economic, demographic, socio-cultural, socio-politic, ecological-material and philosophical,/symbolic, /ontological
Gender		Inductive	How the gender perspective was included in the documents, gender = as a sociodemographic variable, gender = gender analysis
Agroecology	Use of words in the paper	Inductive	Whether the agroecological paradigm was incorporated in the publications: Yes = term and activities included, No = neither the term nor the activities are included, No term = the term is not included but the activities are included
	Activities	Inductive	What were the agroecological practices, strategies and activities that the studies associated with the neo-rural phenomenon
	Domains of transformation (Anderson et. al, 2019)	Inductive	To which domain do the agro-ecological activities in the publications refer: access to natural ecosystems, knowledge and culture, systems of exchange, networks, discourse, and gender and equity
	New rural development paradigm for agriculture (Ploeg and Roep, 2003)	Inductive	To which strategy do the agroecological activities described in the publications refer: deepening, broadening and regrounding
	Agrosocial Paradigm (Monllor, 2013)	Inductive	To which component do the agroecological activities described in the publications refer: autonomy, cooperation, diversity, environment, innovation, local scale,

slow focus and social
commitment
