

Saltonstall et al. 2020. A perfect storm: ploidy and preadaptation facilitate *Saccharum* spontaneous escape and invasion in the Republic of Panama

Supplementary Figures:

Supplementary Figure S1: Principle coordinates plots based on pair-wise Lynch distances showing geographic clustering of accessions collected across the native range of *Saccharum spontaneum* and in Panama. The subset of samples from the World collection represented in our “Historical” category are included here based on their country of origin. A) Axes 1 & 2, B) Axes 2 & 3
