

Supplement Table 2. Model evaluation metrics for ensemble models summarized by the median, mean, and mean weighted by the area under the ROC of single models. ROC-scores are given for testing and evaluation data along with sensitivity and specificity of the different ensemble models.

ensemble method	Testing data	Evaluating data	Sensitivity	Specificity
median	0.911	0.721	86.364	85.714
mean	0.939	0.814	90.909	90.476
weighted mean	0.943	0.830	90.909	92.063
