

Supp Figure . Panel A demonstrates appearance of spheroids formed by 4TBM and 4TLM cells that are either untreated (Vehicle) or treated with BMP-1 inhibitor UK383367 (UK). Panel B shows the colonies of 4TBM and 4TLM cells following treatment with BMP-1 inhibitor. Panel C shows appearance of colonies of 4TBM and 4TLM cells that are either untreated (Vehicle) or treated with TGF- β inhibitor SB431542 (SB). Panel D demonstrates colony formation of MDA-MB-231 and MCF-7 cell that are either untreated (Vehicle) or treated with BMP-1 inhibitor UK383367 (UK).
