

Information recorded by citizen scientists in each dataset

- Sample location (latitude/longitude)
- Site name
- Date/Time
- Observer name
- Type of freshwater body: pond/stream/lake/river/wetland/other
- Photograph of sampling site
- Surrounding land use (photographic supported drop down menu)
- Type of pollution sources (drop down menu)
- Evidence of the water uses (drop down menu)
- Identification of bank vegetation (drop down menu)
- Presence of aquatic life (drop down menu)
- Water (drop down menu)
- Water colour (drop down menu)
- Evidence of surface pollution
- Presence of elevated phytoplankton density or attached algae
- Concentrations of nitrate and phosphate
- Measurement of turbidity
