

Electronic Supplementary Material 2 (ESM2)

Article title

Temporal variability of a protected multispecific tropical seagrass meadow in response to environmental change

Journal

Environmental Monitoring and Assessment

List of climate variables tested as predictors of change in seagrass cover

Average daily mean temperature during the previous month

Average daily mean temperature during the previous 2 months

Average daily mean temperature during the previous 3 months

Average daily minimum temperature during the previous month

Average daily minimum temperature during the previous 2 months

Average daily minimum temperature during the previous 3 months

Average daily maximum temperature during the previous month

Average daily maximum temperature during the previous 2 months

Average daily maximum temperature during the previous 3 months

Average total daily rainfall during the previous month

Average total daily rainfall during the previous 2 months

Average total daily rainfall during the previous 3 months

Average daily mean wind speed during the previous month

Average daily mean wind speed during the previous 2 months

Average daily mean wind speed during the previous 3 months

Average daily maximum wind speed during the previous month

Average daily maximum wind speed during the previous 2 months

Average daily maximum wind speed during the previous 3 months

Average monthly cloud cover during the previous month

Average monthly cloud cover during the previous 2 months

Average monthly cloud cover during the previous 3 months

Occurrence of storms during the previous month

Occurrence of storms during the previous 2 months

Occurrence of storms during the previous 3 months

Average daily number of sunspots during the previous month

Average daily number of sunspots during the previous 2 months

Average daily number of sunspots during the previous 3 months

Maximum tidal amplitude during the previous month

Maximum tidal amplitude during the previous 2 months

Maximum tidal amplitude during the previous 3 months

Minimum diurnal low tide height during the previous month

Minimum diurnal low tide height during the previous 2 months

Minimum diurnal low tide height during the previous 3 months
