

Online resource 2: Acoustic bat activity of *Nathusius' pipistrelle* for all monitoring locations

The recorded acoustic bat activity of *Nathusius' pipistrelle* per monitoring location per year is shown below. In these figures the dots refer to positive minutes with acoustic activity throughout the night (time interval between sunset and sunrise is represented by grey) and throughout the season. The effective monitoring period is indicated by a white background, whereas a blue background indicates no monitoring. The monitoring location and calendar year are indicated in the upper right corner of each figure.
