

Supplementary Fig. 1. Projected case numbers and age-standardized DALY rates for schizophrenia in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.

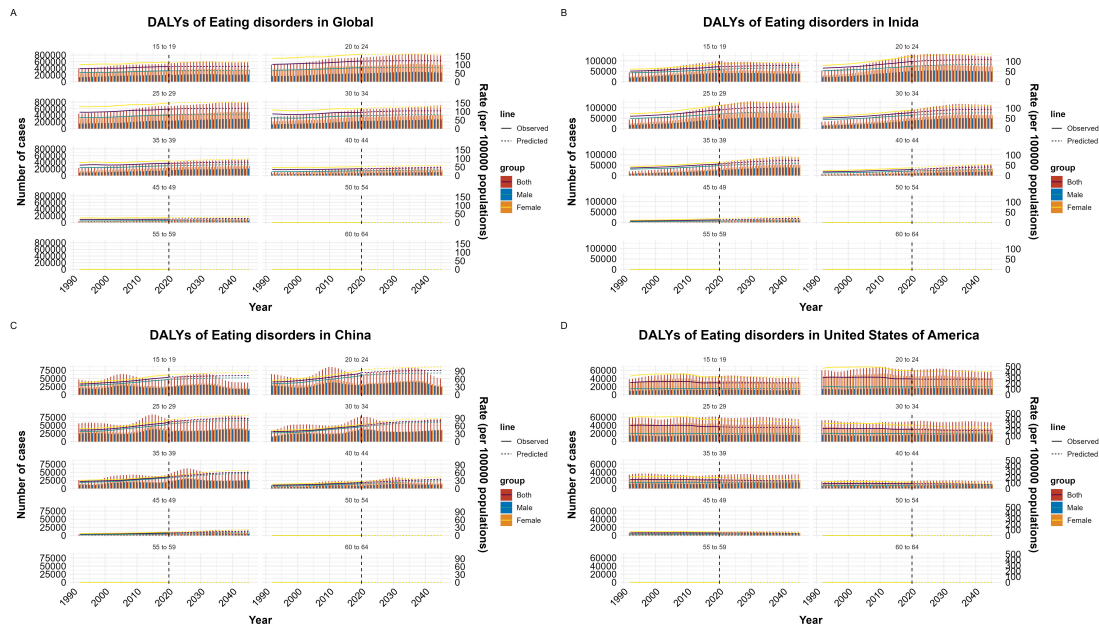

Supplementary Fig. 2. Projected case numbers and age-standardized DALY rates for depressive disorders in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.

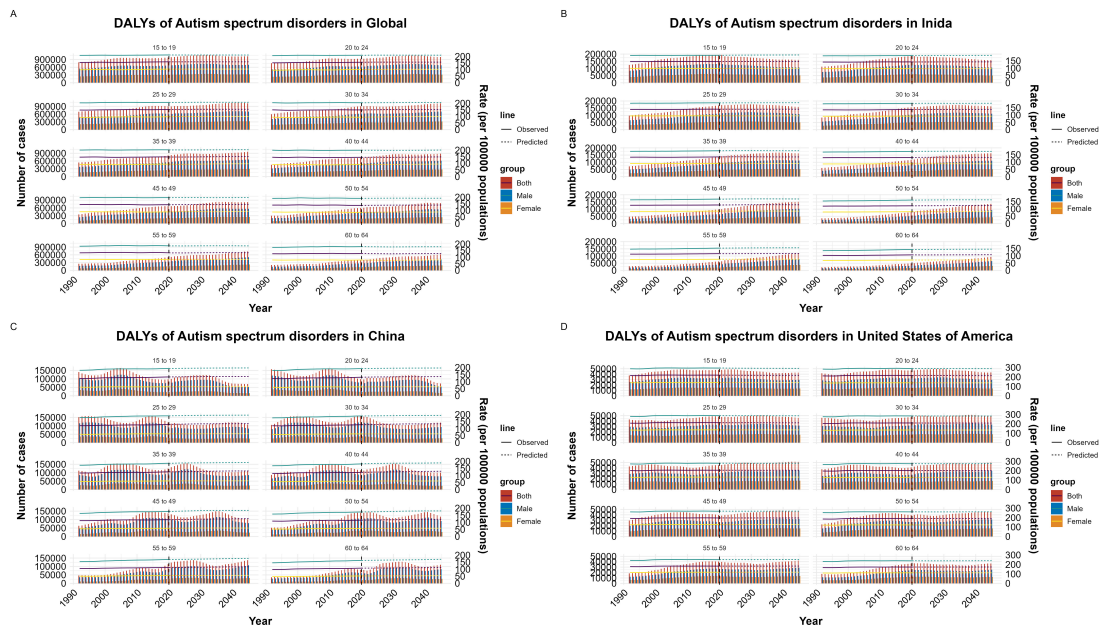

Supplementary Fig. 3. Projected case numbers and age-standardized DALY rates for bipolar disorder in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.

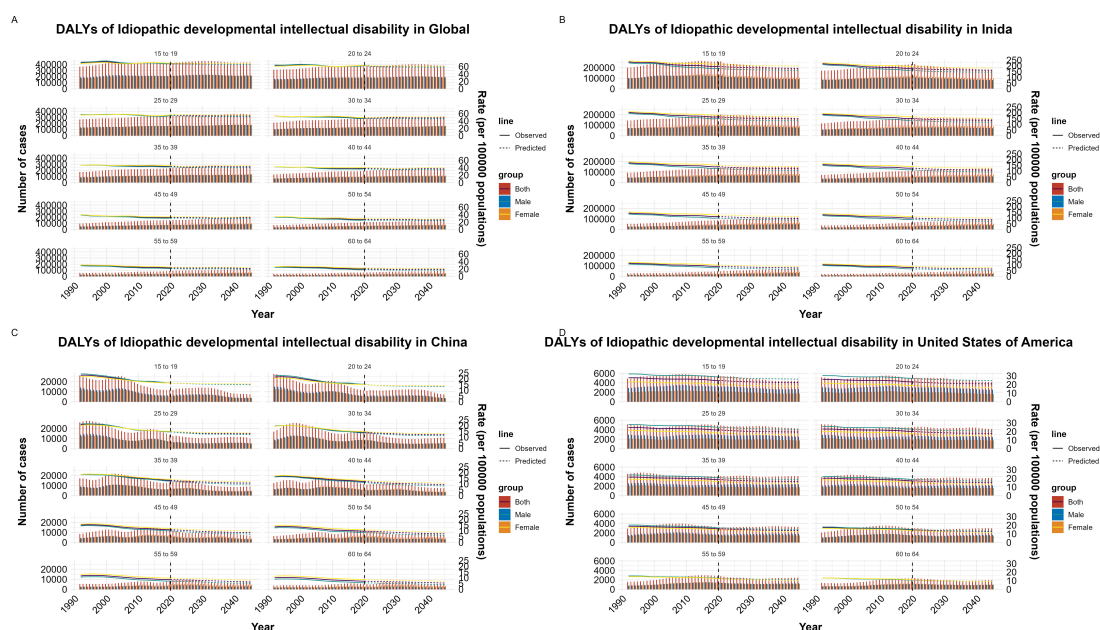

Supplementary Fig. 4. Projected case numbers and age-standardized DALY rates for anxiety disorders in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.

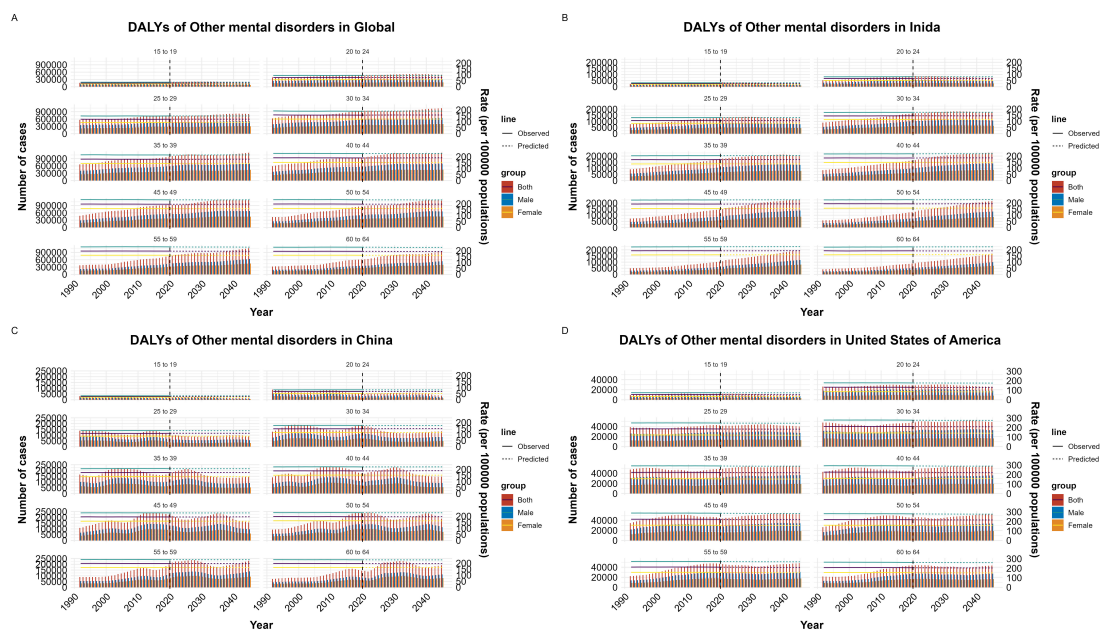

Supplementary Fig. 5. Projected case numbers and age-standardized DALY rates for eating disorders in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.

Supplementary Fig. 6. Projected case numbers and age-standardized DALY rates for autism spectrum disorders in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.

Supplementary Fig. 7. Projected case numbers and age-standardized DALY rates for idiopathic developmental intellectual disability in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.

Supplementary Fig. 8. Projected case numbers and age-standardized DALY rates for other mental disorders in the working-age population (in five - year intervals), by sex and location (global and top three most populous countries), 1990–2045.
