Supplementary Fig. 1 Maximal severity from the daily survey versus the average from the 3-month recall for the total core symptom severity score and for individual item scores

*A subset of patients with the individual symptom on the daily survey failed to report the symptom on the 3-month recall survey. Horizontal lines show median values, boxes show interquartile range, open circles show mean values, and whiskers show minimum and maximum values within the 1.5 IQR above or below Q3 and Q1 values. Any points outside are displayed as outliers. IQR, interquartile range; Q1, first quartile; Q3, third quartile
