

Table S1 Coefficients from ordinary least squares models predicting the log amount of Mexican migrants' remittances and saving from legal status, deportations, and selected control variables between the years 1970-2019

Independent variables	Log amount remitted and saved	Log amount remitted only	Log amount saved only
Legal status			
Undocumented	-0.223*** (0.047)	0.069 (0.065)	-0.358* (0.155)
Deportation indicator			
Lagged deportations/100,000	-0.209** (0.067)	-0.077 (0.060)	-0.448 (0.278)
Interaction			
Undocumented × Lagged deportations/100,000	-0.004 (0.068)	-0.025 (0.064)	0.393 (0.307)
Demographic background			
Age	0.005 (0.009)	0.019 (0.012)	0.028 (0.029)
Age squared	-0.001 (0.001)	-0.001 (0.001)	-0.001 (0.001)
Female	-0.326** (0.105)	-0.335** (0.119)	-0.221 (0.279)
Married	-0.041 (0.040)	0.064 (0.055)	-0.192 (0.144)
Number of minor children	0.010 (0.009)	0.004 (0.013)	-0.006 (0.040)
Years of education	0.008 (0.005)	0.006 (0.006)	0.011 (0.015)
Connections to U.S.			
Spouse in U.S.	-0.251*** (0.077)	-0.286** (0.099)	-0.184 (0.161)
Children in U.S.	0.028 (0.066)	-0.016 (0.085)	0.169 (0.175)

Continued

Table S1 Continued

Independent variables	Log amount remitted and saved	Log amount remitted only	Log amount saved only
Economic status in U.S.			
(ref. not working)			
Agricultural job	0.021 (0.134)	0.374** (0.142)	0.614 (0.339)
Blue collar job	0.002 (0.133)	0.407** (0.139)	0.582 (0.339)
White collar job	0.066 (0.136)	0.329* (0.143)	0.472 (0.352)
Disposable monthly income/1,000	0.005 (0.004)	0.040*** (0.010)	0.016* (0.008)
Banked	0.115* (0.052)	0.058 (0.074)	0.575*** (0.173)
Credit card	-0.059 (0.094)	0.163 (0.109)	-0.421 (0.262)
U.S. experience			
Interviewed in U.S.	-0.277** (0.090)	-0.193*** (0.061)	-1.293*** (0.274)
Years spent in U.S. on last trip (ref. 3+ years)			
Less than 1 year	0.262*** (0.041)	-0.171*** (0.054)	1.852*** (0.152)
1-3 years	0.063 (0.041)	-0.094 (0.049)	0.981*** (0.148)
Lagged U.S. unemployment rate (deciles)	Yes	Yes	Yes
R ²	0.092	0.059	0.340
N	2,479	2,067	591

Note. Robust standard errors are in parentheses. Ordinary least squares models are estimated for the log amount remitted and saved. The amount of remittances and savings are added, if survey respondents say that they remit and save. The amount remitted only provides the amount remitted by respondents who report remitting only. Otherwise, it is set to zero. The amount saved only provides the amount saved by respondents who report saving only. All amounts are inflation adjusted to 2019 U.S. dollars. *p<0.05; **p<0.01; ***p<0.001
