

Fish volitional and non-volitional swimming performance for fishway design: An evidence-based review – Supplementary Document

Defined flow criteria	9	0	2	1	4	3
Modelled fish passage	8	0	5	4	6	0
Reported comparative performance	5	1	0	4	3	4
Application not specified	29	2	6	3	3	1
Not fishway-related	62	8	6	5	4	0
	Respirometer	Arena	Flume (conduit)	Flume (channel)	Raceway	Physical fishway model
Equipment						

Fig. S1 Number of assessments categorised based on the test equipment used relative to their description of data application, with flume apparatus distinguished between those with fully submerged swim chamber (conduit) and those with air-water interface in the test area (channel).
