A8 Introduction for interviewers

Hello. I come from *Organization*. We are conducting a survey about the sanitation situation in *City*, and thus we would like to ask questions about your sanitation situation and what your experiences and preferences are regarding sanitation issues.

Your participation and genuine responses will be of great help in the improvement of sanitation, health and hygiene in this zone and other communities in *City*. All the information you give will be treated confidentially and only used for this study purpose.

This survey will take about 20 minutes of your time. You do not need to talk to me if you do not want to, I will keep everything that you tell me entirely private and confidential, and will not talk to other people about what you have said. We will also keep you and your family's names confidential, and not tell anyone that you have talked to me.

Your answers will in no way affect the assistance that your community or your family receives. If you decide to take part in this survey, please answer as honestly and freely as you can. We have no expectations for your answers to go in a certain direction. The more genuine answers we receive, the easier it will be for us to help improve the sanitation in *City* in the future.
