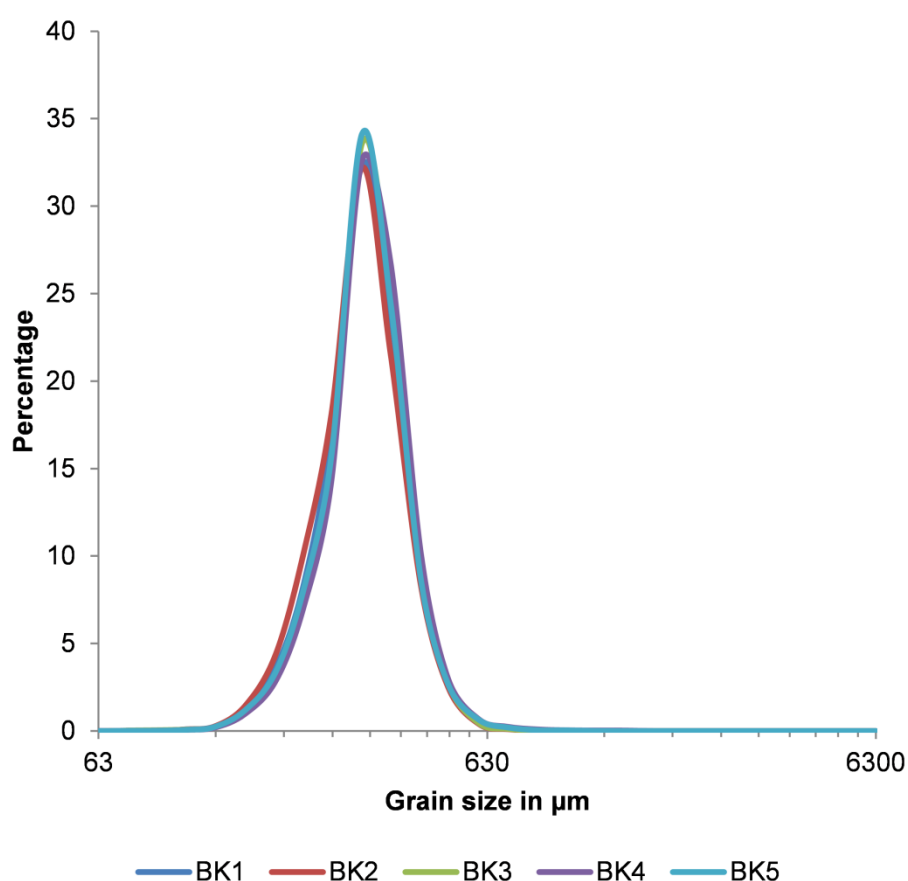

Figure 1 Grain size analysis results for five sediment samples at the sewage treatment plant Bülk (BK1 – BK5). On the x-axis the grain size is displayed on a logarithmic scale. The y-axis displays the percentage share of the whole sediment sample

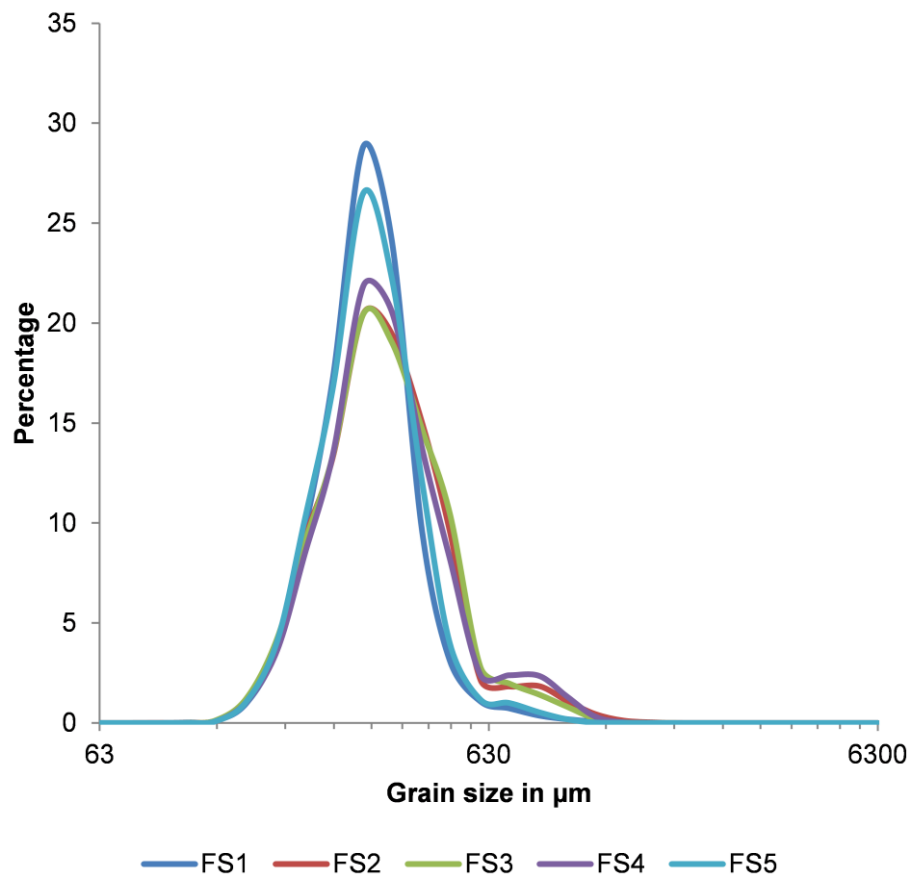

Figure 2 Grain size analysis results for five sediment samples at Falckenstein beach (FS1 – FS5). On the x-axis the grain size is displayed on a logarithmic scale. The y-axis displays the percentage share of the whole sediment sample

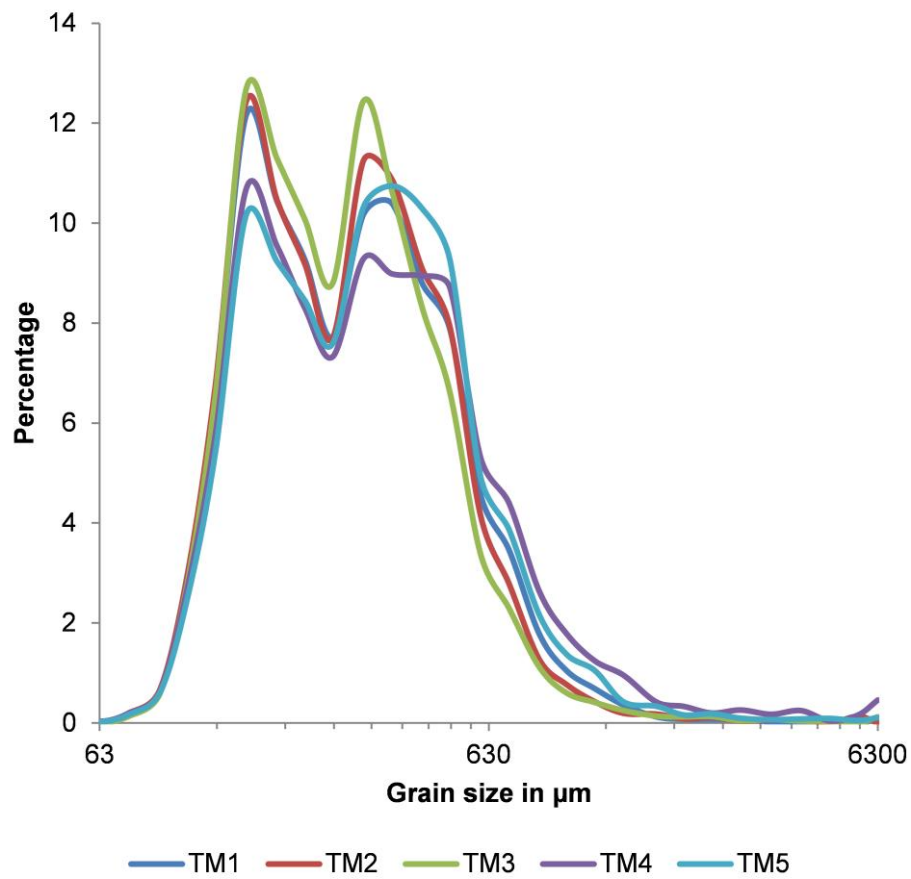

Figure 3 Grain size analysis results for five sediment samples at Tirpitzmole (TM1 –TM5). On the x-axis the grain size is displayed on a logarithmic scale. The y-axis displays the percentage share of the whole sediment sample
