

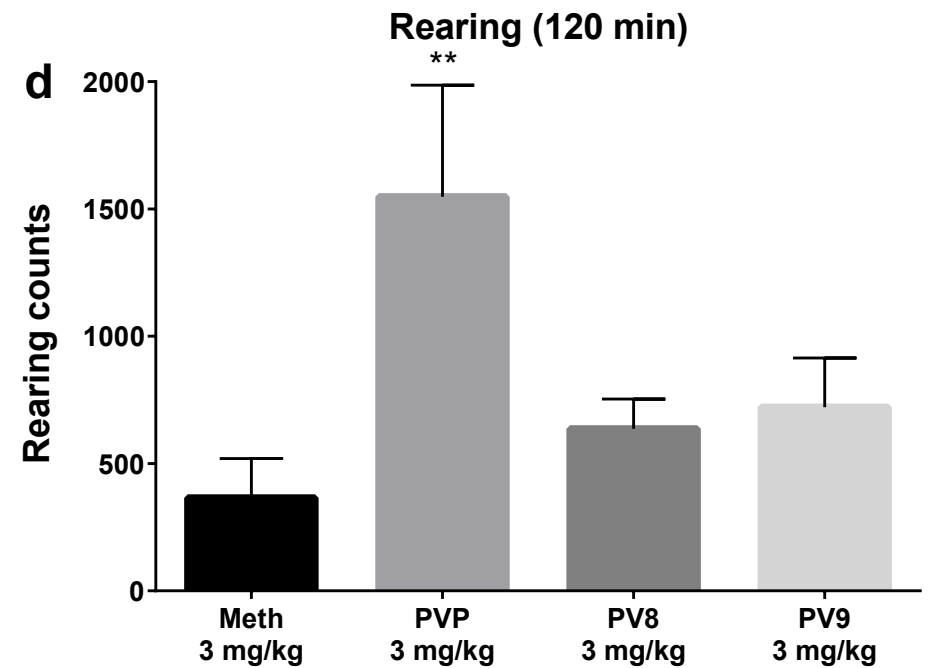

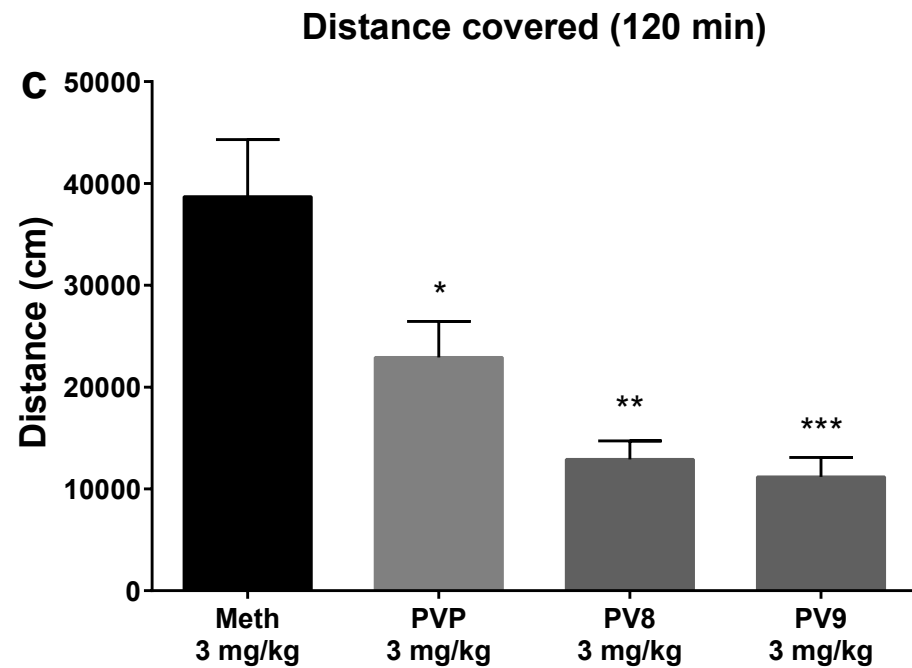

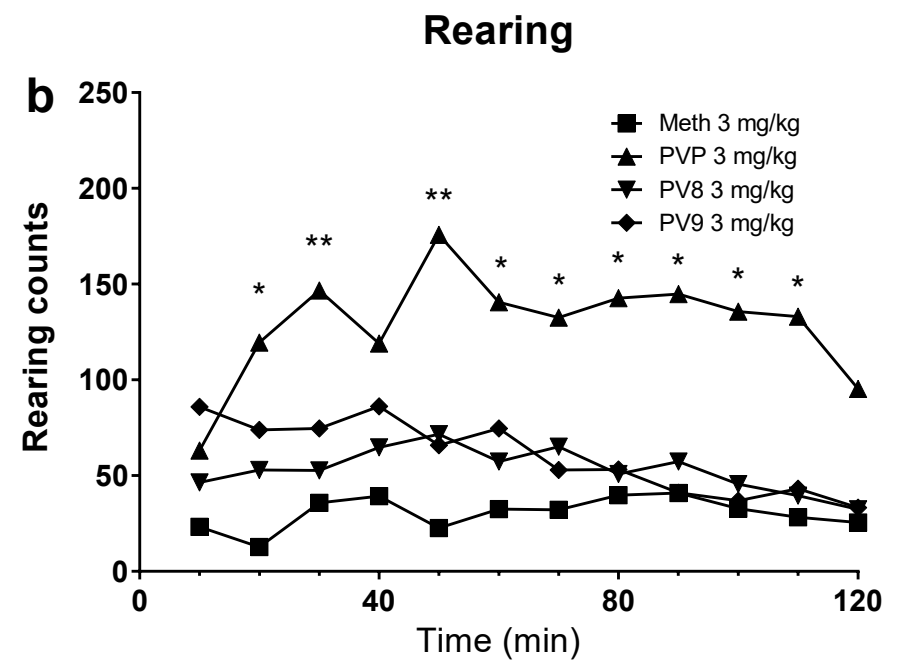

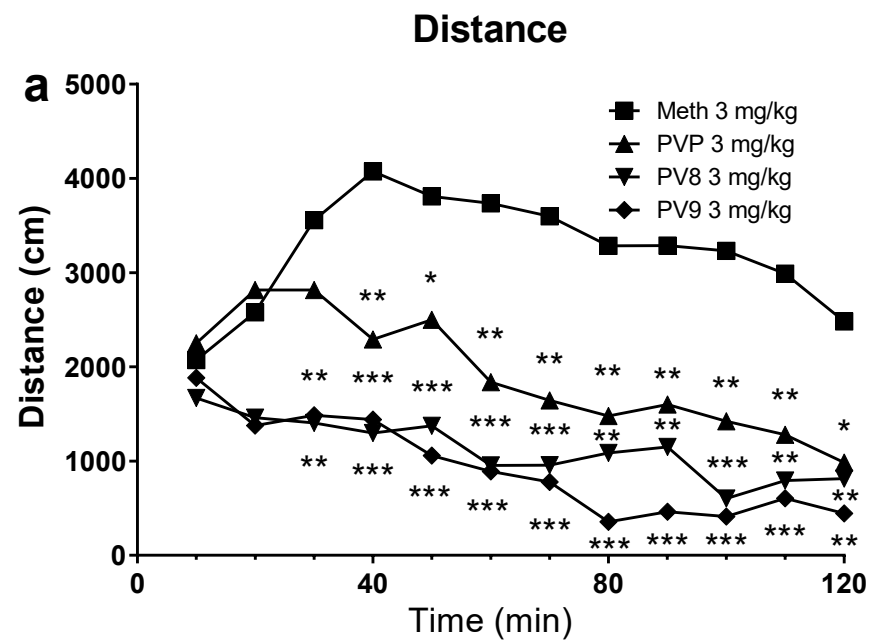

Fig. S2 Comparison of potency to increase spontaneous locomotor activities in mice of alpha-PVP (PVP, 3 mg/kg), PV8 (3 mg/kg) and PV9 (3 mg/kg) with methamphetamine (meth, 3 mg/kg). Average horizontal (a) and vertical (b) activities in 10-min bins. Total distance travelled (c) and total rearing counts (d) during 120 min. Data presented as mean (n = 7-8) (a and b) or mean +/- SEM (n = 7-8) (c and d). *** $p < 0.001$; ** $p < 0.01$; * $p < 0.05$ against methamphetamine
