

Connection with the natural environment of Purchena.

Researchers at the University of Almeria are working on a study that seeks to better understand the relationship between people and nature. In particular, we are exploring how connected people in rural areas are to nature, and how changes in landscape and/or nature-related practices influence the relationship between humans and nature in these areas.

To this end, we are conducting a survey and it would be very useful to know your opinion. No knowledge is required to answer this survey. We are only interested in hearing people's opinions and concerns. All surveys are anonymous and only take 10/15 minutes to complete. There are no right answers, we are only interested in what you think!
Thank you very much!
